

# The "Notes" critiquing tools now include video mark-up

For Spring 2018, we have added video mark-up to the [Notes critiquing interface](#).

Please watch this brief tutorial to learn more...

## Please Note:

- In addition to frame-by-frame visual markup, you can use [video and audio recording tools](#) to comment on individual frames.
- The video mark-up tool currently supports videos in mp4, flv, mov, webm, and avi formats. Please [contact the Online Help Desk](#), if your students are submitting videos in a format that is not on this list.

## IMPORTANT

**From now on, the old Flash-based whiteboard will no longer be available.** Students will still be able to view markup their instructors made with the whiteboard in past semesters, but the whiteboard can no longer be used for new critiques.
